

COL781 Assignment 4

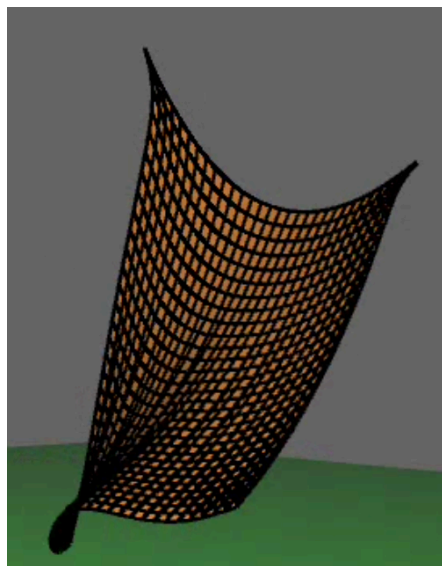

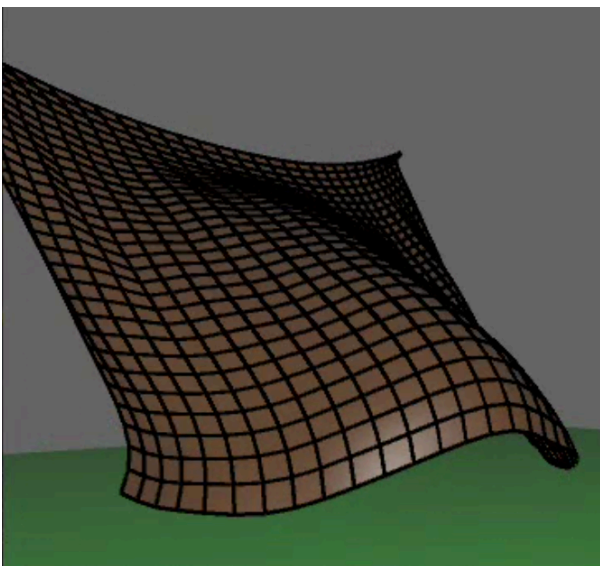

Aditya Upadhyay (2021ME10275) & Dhruv Ahlawat 2021CS10556)

➤ Animation link: [COL781 Assignment 4 animations](#)

Part 1

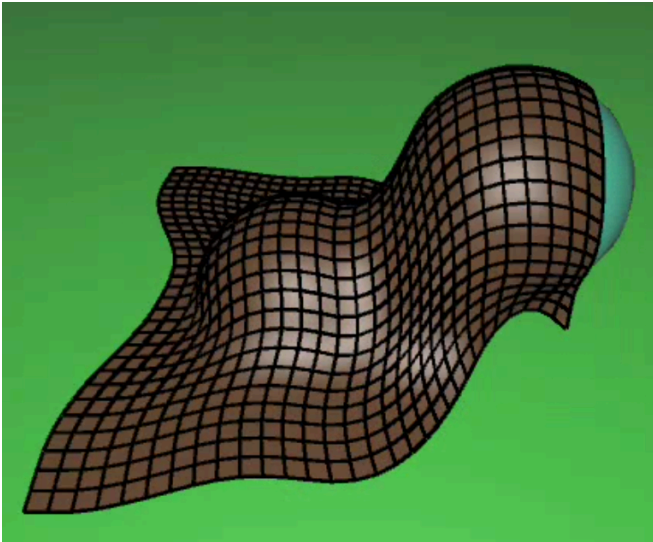

Part 2

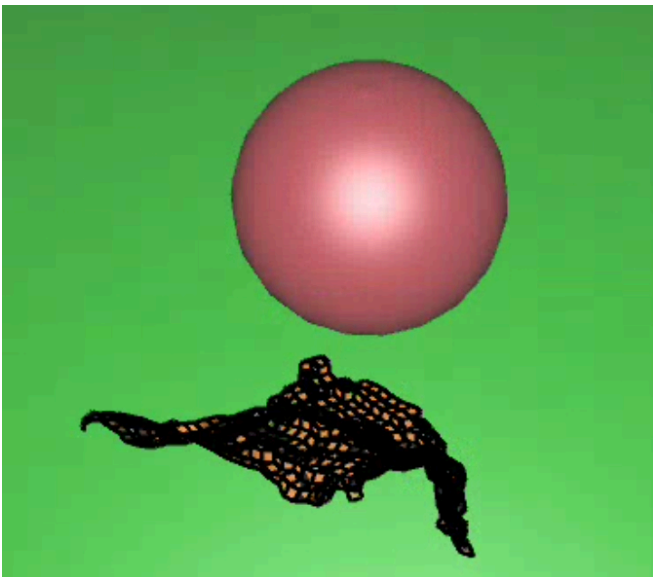

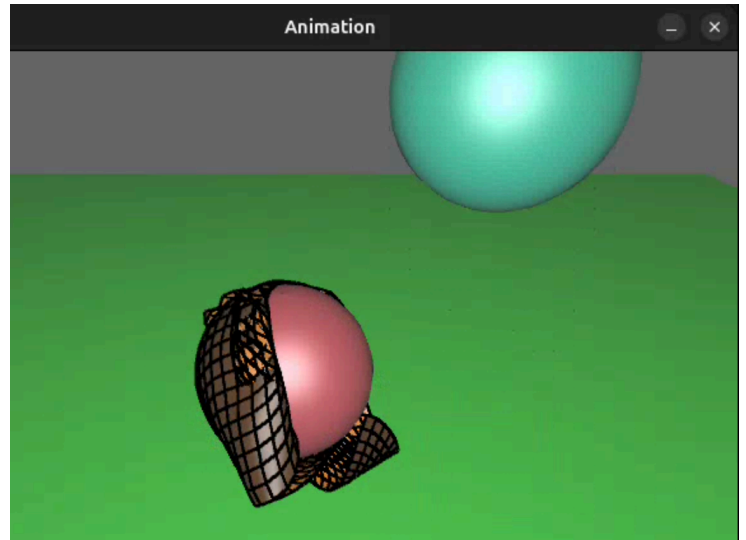

Part 3

2 balls moving upwards

Rumpled cloth on the ground

Optional Task: Inextensible cloth, enabled using the bool **usingConstraints** in the Cloth class.

We implemented all the required parts, and the extra optional part partially, since handling collisions for the character was a bit tricky.

Discussion:

Used an object oriented approach, with capabilities of adding multiple objects to the scene along with different coefficients of friction or restitution.
